

Coos Bay School District 9

Code: **JHCCF**
Adopted: 5/10/04
Readopted: 3/28/11; 5/12/14; 4/13/15
Orig. Code(s): JHCCF

Pediculosis (Head Lice)

The Board recognizes that district programs should be conducted in a manner that protects and enhances student and employee health and is consistent with recognized health practices. Consequently, in order to prevent the spread of pediculosis (head lice) in the school setting, district staff shall institute guidelines for classrooms that will assist in the prevention and spread of head lice. Students with suspected cases of lice will be referred to the school nurse or building administrator for assessment. Students found with live lice may be restricted from school only upon determination by the district nursing staff. Students restricted from school will be readmitted after assessment by designated personnel. Students with a history of lice may be subject to periodic checks.

Successful treatment of head lice requires a coordinated approach and may involve the use of anti-lice products, combing and implementation of preventative measures recommended by health authorities. The district will provide parents of students found to have contracted head lice with treatment information. It is the district's intent to not only eliminate the current infestation, but also to prevent a repeat episode.

The superintendent will develop administrative regulations, as necessary, to implement this policy.

END OF POLICY
